13. OTHER COMMENTS

- Every human being should be treated the same way
- Home is where your heart is
- Stick to the roots, Heimat is traditions and language
- Heimat is to me the place I grew up, when you move to new place this place will never be my Heimat but just the place I live
- Actually I don't know where my Heimat is.
- It is important to make immigrants feel welcome
- They are humans too, we should be nice to them
- If I sometime have to flee I would love to be respected, therefor you should help the immigrants
- I think wherever we go we should try to integrate and make ourselves feel at home

13. OTHER COMMENTS

- “Fremde sind Freude die wir nur noch nicht kennen”. Irish.
- In our country women and girls don’t behave as humans and have no rights.
- I think if people started to accept their earlier life and culture it would be so much easier to talk to them, only a small hallo or a little smile actually do help. Everyone should at least give them a smile if you walk past them
- I accept everyone no matter where they are from. I don’t see the point in discriminating people based on their skin color, language, religion, sex or anything else. The world should not be used as a place for war and fights.
- I will accept all the people if they accept me. I will look at them the same way I look at xxx, we are all the same. So if they are nice, I will be nice back.
- Both parts has to work to make a better place for all, greet them
- Immigrants must adapt or respect religion, culture, way of life in the new country
- The most important thing is smiling. A single smile effaces everything!

12. What can you do/have you done to make immigrants feel welcome? Some opinion of our students:

- Nothing. They should go back to their homeland and fight the ISIS.
- Nothing. I do not care about their feelings and what they are going through. If they want to live in our country, they must follow our rules and adapt to our culture and traditions.
- I am nice to them, I treat them like all other people. I do not want to support racism, so I perceive them as ordinary people like me or you.
- If people migrate to a foreign country, they must accept the culture and rules of the country. Nowadays, especially Muslims ignore our European customs and behave as if they were in their country of origin, even in our country with such bad laws where is no equality between men and women. I am not influenced by media, nor a racist. My cousin was in Afghanistan and told us what people are like there and such people migrate to our country.
- I am not an adult, so I cannot do anything at all.
- I treat them as ordinary people who were born in the same country like me. I do not like racism.
- Actually, I do not know what I could do for them.
- I have never done, nor will do anything. I think the migrants want to suck out the developed countries as much as possible. There are no old people, women or children. Where are they? In the news I can see just young men (aged 20-35), who have cowardly fled from their homeland instead of defending it against the war. And their behaviour? They do not try to adapt or live with us following our laws and rules. I am sick of our government trying to get them here and earn as much money as possible. Thank you for reading my opinion.
- I do not know what I should do.
- I would treat them as any other human beings.
- Nothing. If they do not behave according to our rules, they do not deserve to feel like at home here.
